

# Diafrikt®

KOVOKERAMICKÉ TŘECÍ MATERIÁLY

MOTOCYKLOVÉ BRZDOVÉ DESTIČKY  
MOTORCYCLE BRAKE PADS

### KOVOKERAMICKÉ TŘECÍ MATERIÁLY

Firma má dlouholetou tradici ve výrobě kovokeramických třecích materiálů pod značkou Diafrikt, kterou se zabývá od roku 1958. Vývoj materiálů zajišťuje vlastním technickým vývojem.

Systém jakosti je certifikován dle ČSN EN ISO 9001:2000

### MOTOCYKLOVÉ BRZDOVÉ DESTIČKY

Tyto materiály jsou nezávadné pro životní prostředí, vykazují nízké opotřebení, vysoký a stabilní součinitel tření a to i při vysokých teplotách.

Vyrábějí se ve dvou materiálových variantách:

#### S6

Materiál S6 je specifikován jako tzv. měkký materiál vyznačuje se schopností spolupracovat s méně kvalitní protiplochou z běžných uhlíkových ocelí typu např. S 235 JR G2 . Z hlediska brzdění je materiál charakterizován pomalejším náběhem na plný výkon a menší schopností pracovat v značně znečištěném prostředí. Materiál je vhodný pro sériové silniční a sportovní motocykly a skútry.

#### K6

Materiál K6, pro svou práci vyžaduje kvalitní nejlépe tepelně zpracovanou protiplochu .Z hlediska provozu se jedná o materiál vyznačující se vysokým brzdovým výkonem. Materiál spolehlivě pracuje ve značně znečištěném prostředí ( bláto, písek – materiál je užívám na dálkových rallye Paříš- Dakar, Master rallye apod.) ,kde si zachovává svůj vysoký výkon. Materiál je vhodný pro sériové silniční a sportovní motocykly.

### FRICION MATERIALS AND CONTACTS

The metal-ceramic friction materials are being produced under the Diafrikt label since 1958. Our firm has a long time tradition an own technical development.

The quality assurance system is certified in accordance with ČSN EN ISO 9001:2000

### MOTORCYCLE BRAKE PADS

All materials are environmental-friendly with low wear and the stable coefficient of friction even under high operating temperatures.

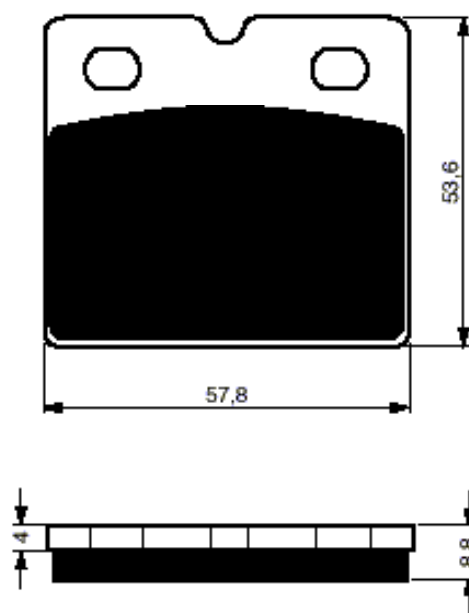

Following two brands of motorcycle brake pads are usually supplied:

#### S6

The S6 material is described as so called soft material which is significant for the possibility of being used together with a lower quality mating face made of common carbon steel, for example S 235 JR G2. Under braking conditions the build-up time of the material's full capacity is prolonged and the material bears small ability to be used in polluted environment. It is suitable for stock road and sports motorcycles, and scooters.

#### K6

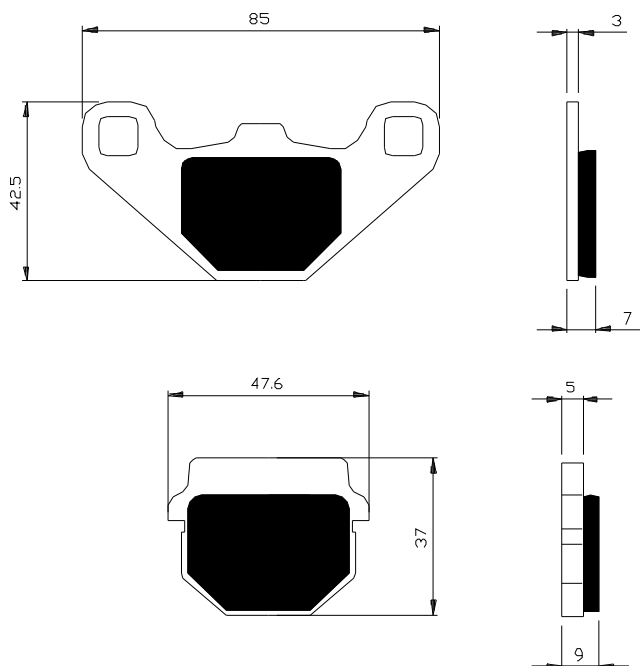

Good quality, possibly heat treated, mating face is needed for the right performance of K6 material. The K6 material has high braking capacity. It is safe to be used in muddy and sandy environment. It is commonly used for long distance rallye, such as Paris-Dakar or Master rallye, with the same level of performance. K6 is suitable for stock road and sports motorcycles.
